| **Unit Narrative:** This unit explores migration in the EU. Within the EU, many types of migration take place, including both voluntary and forced migration. After the violence and bloodshed of the Second World War, many European countries came together and created a union in order to ensure lasting peace. One of the products of this union was the development of a free travel area called the “Schengen Area,” which materialized in 1985. This agreement allows most EU citizens to live, work, and travel to other EU countries within the Schengen Area without a visa and other requirements. This agreement brings opportunities to and benefits EU citizens.  
While the European continent sees voluntary migration happen every day, EU countries also experience the influx of migrants who are forced to leave their home due to conflict outside the EU. This is very challenging for EU countries, but also those who are forced to leave their homes.  
This unit will allow students to explore how the Schengen Agreement has kept the EU unified. |
